Poll Everywhere Overview: Access & Navigation

What is Poll Everywhere? Poll Everywhere is a web-based app for creating live, interactive activities to engage an audience and encourage active learning.

The purpose of this video is to show you how to access and navigate Poll Everywhere.

To access Poll Everywhere. Go to polleverywhere.com

Click on log in. Enter your university email.

Click next. And then click "Log in with University of Colorado".

This will take you to the single sign in Portal Page.

Enter your credentials. And this will take you to your Poll Everywhere dashboard.

Let's first go over the elements of the dashboard.

From the dashboard, you able to create a new activity and also go to a list of activities that you've already created. You can also see a list of your recent activities. You're able to view and edit your poll response URL. And you are also able to view reports related to your activities.

And over on the right side, there is also a start learning button that you can click to be taken to their training area, where there is more resources for learning more about the ins and outs of the software.

There is also a menu on the left side of the screen that contains many of the same items as the dashboard does.

You can view your activities.

You can go to the participants page where you can customize the pull participants, your reports page, and also you can create teams as well.

And down here at the bottom, you have help and presenter tips which are just support resources, much like the learning link is and also your profile access here, which is the same as clicking on this response. URL link. Let's see what some of these things can do.

First, we will go to the activities list, which you can.

Reach by the dashboard link here or also the link on the site.

Here, you will see a list of all of your activities you've created.

You can create new activity here as well. And you can create folders to group like activities together.

And it also helps if you need to share certain activities with group members and participants.

And you also able to upload, bulk activities. So if you download this CSV template simple and full columns that you just fill out with the activity type and the question and the question option or the answer options, and then you can upload that CSV here and it will create or book creates your activities for you. And then when you upload that CSV, all of them will be listed down here at the bottom.

From here, we can go to the participants tab. And here you can select participants that you may need to put into groups or just participants that you want to have access to your activities and you can customize and control all that from this screen here.

Next up, we have reports and this will just give you reports for your activities, for the activity but the participants, average responses, the engagements, all the basic analytics that you'd probably want with any kind of an interactive activity like this.

Let's go back to the home, dashboard and let's click on the activity response URL to edit the information here.

At the top, you can change your full URL.

And you can download a QR code as well that you can put into your presentations or show on the screen for participants to scan and join the activity.

If you do download a QR code, do it after you change the URL, if you do change the URL. And of course, your profile information here as well.

But on the side is where your kind of global activity controls are.

You have activity settings so you can exclude screen names.

You can exclude or restrict participants.

You can allow participants to change their answer or not and a couple of other settings as well.

And that's just something you can go through and just set that up to align with what you need for the activity.

There is a branded response page if you want to customize any of the branding colors, things like that, the image. It will change the background color of this bottom banner, the whole background. And of course, you can change the image as well. And there's two tabs up here, your colors and then your content.

And this features tab is basically prerelease and beta features you can activate if you would like to test out, test out new features that aren't implemented in the release version of the software.

And that's the overview of how to access and navigate the Poll Everywhere app.
