HEHE 5850 001
Clinical Ethics
Jackie Glover, PhD and Brian Jones, MD
Tuesdays, 5:00 – 8:00 PM
On-line Seminar

The goal of the Clinical Ethics course is to introduce students to the theory, methods, history, and application of clinical ethics. It will provide a broad overview of clinical ethics while encouraging students to engage deeply with typical cases (including their own) encountered in clinical ethics. Instructors include a physician/ethicist and a philosopher/ethicist who both do ethics consultation at area hospitals.
