Successful leader inspiring strategic vision and best practices in utilization of e-learning technologies to meet teaching and research needs of health/sciences enterprise.

Effective manager of daily operations, communication media and instructional technology, within an academic health sciences environment.

Innovative creator of online course content, e-learning modules, presentations, newsletters, websites, posters and award-winning videos. Expert in presentation and instructional design, learning management systems, photography, video production, audio visual systems and videoconferencing technologies.

Experience

Manager of Operations and Educational Technology *2012-present*
University of Colorado – Center for Bioethics and Humanities

Support the Director in developing and achieving strategic goals and objectives. Provide leadership in evaluation, adoption and utilization of best practices in teaching technology. My roles at the Center are varied and include coordinating marketing and special events for the Center and assisting faculty with presentations, publications, online learning content and webinars. Recently produced over 40 case-based learning modules for the first Masters in Palliative Care program in the US. Manage daily operation of the [Fulginiti Pavilion for Bioethics and Humanities](#) and [Art Gallery](#). Act as liaison between the Center for Bioethics and Humanities and campus support departments, conference facility users, vendors and contractors. Develop and maintain operational policies. I also provide graphic design services, and serve as the [Center's webmaster](#).

Educational Technology Manager *2003-2012*
University of Colorado - Physical Therapy Program

Envisioned and implemented transition to digital learning resources for entire curriculum. Mentored faculty in new instructional strategies utilizing Blackboard LMS. Eliminated paper course packets, saving time and labor. Produced hundreds of short video clips demonstrating therapy techniques. Enhanced reputation and excellence of PT Program by integrating effective instructional design, innovative teaching technologies and faculty mentoring in adoption of best practices in e-learning.

Assistant Director, Educational Support Services *2000–2003*
University of Colorado

Led a team of 12 media specialists from a traditional analog production environment into the digital age. Developed digital workflows for photography, graphics and poster production. Updated audio/visual systems and services. Established the *Educational Technology Lab*, a self-service media production facility for faculty and university staff, offering training and resources for digital video and scanning, to enhance presentations and research documentation.

Additional Experience

David M. Weil
