Settlement Notice

Project Description

CU Denver is addressing roof deck drainage problems and water infiltration at the 4th, 5th, and 6th floor roof decks of the Business School. Existing composite decking on all three levels has been removed to prepare for permanent repairs and stopgap water barriers have been installed at the storefront doors to reduce ongoing water infiltration. The project includes a base bid, 8 construction alternates and a 9th alternate to include the cost to administer prevailing wage rates. CU Denver anticipates ultimately making repairs on all roof decks shown in the construction drawings.

The base bid includes repairs and resurfacing to Deck 6C on level 6. Subsequent alternates are organized according to their level of priority. The entire project (base and alternates) involves installation of new cast-in-place concrete and polyacrylate underlayment (Division 3), masonry cavity drainage maintenance at the weepholes and vents (Division 4), decorative metal railings (Division 5), miscellaneous rough carpentry and plastic structural assemblies (Division 6), Dex-Flex waterproof traffic coating system, flashing, sheet metal and joint sealants (Division 7), openings, aluminum framed entrance and storefronts and glazing (Division 8), finishes, non-structural metal framing, gypsum board systems, tile carpeting and interior painting (Division 9). The general contractor is responsible for removing, furnishing, and installing everything shown on the construction drawings per specifications.

All debris and garbage generated from this project must be removed from the site by the general contractor. Coordinate all work with CU's construction manager to coincide with university operations. The Business School will remain occupied throughout much of the construction. The general contractor is responsible for providing all general conditions and general requirements including but not limited to on-site supervision, dumpsters, progress cleaning, etc. The general contractor will be required to provide for costs associated with installing during winter conditions such as snow removal, tenting, heating, etc.
